

Year 6 Home Learning

Spring 1

Maths

MyMaths homework will be set as per the homework policy with weekly tasks linked to class topics. There will be a weekly start and end date for each task set meaning a shorter window of completion.

English

Please see the supporting document for the English homework this half term. We would like you to write a descriptive piece – think about using similes, metaphors and personification to add depth to your writing. You can email them into the class email once you have done them.

Reading

Please encourage your children to read a little every day and practice their comprehension skills by asking them about their book. Children will have the opportunity to visit the school library daily.

Science – Living Things and their Habitats

What is a habitat? What habitats or micro-habitats are there locally to where you live? Which animals live there? Which habitats are near extinction in the world and which animals are in danger? Why? Create a poster, PowerPoint or written explanation to respond to these questions. You can use pictures to add to your work.

Topic – Geography: Where does our energy come from?

This half term we will be looking at how energy is generated. We would like you to find out about the different ways countries try to make their energy sustainable.

Wellbeing

Give journaling a try! Use words, pictures or doodles to recall your day or an event. How did you feel? What did you enjoy? What didn't go as well?

PE

Do this mini-workout and time how long it takes you.

Workout:

- 10 hops on one leg
- 5 burpees
- 10 star jumps
- 10 lunges
- 30 second jog
